

# The title

and a possibly very long subtitle

The Author  
The Institution

# The first section

# The first slide

It just contains some **text** in *various* styles ~~in~~ it.

# The second slide

A first, multiline paragraph with some random words and even a correctly placed footnote!<sup>1</sup>

And a second, shorter paragraph here.

---

<sup>1</sup> This is the footnote.

# Some nested bullet points

- ▶ one
- ▶ two
  - ▶ one
    - one
    - two
    - three
  - ▶ two
  - ▶ three
- ▶ three

# And a nested numbered list

1. one
2. two
  - 2.1 one
    - 2.1.1 one
    - 2.1.2 two
    - 2.1.3 three
  - 2.2 two
  - 2.3 three
3. three

# Another text slide

Where the text

Is followed by a colorful subheading

And some more text that doesn't say anything particularly interesting.

# A quote

Introduced by some text, here are

*Some words of wisdom*

And a closing comment.

# The fancy section

# An image

SPRÅKBANKENTEXT

Figure 1: With a caption

# Some code

A syntax-highlighted code example:

```
haskellExample :: From -> To
haskellExample from = to
```

Plus some inline monospaced text just because we can.

# A little bit of math mode

Here is a pretty random formula:

$$\int_a^b f(x)dx = F(b) - F(a)$$

With equal spacing above and below, *obviously*.

# And finally, a table

As always, a very realistic example:

col a	col b	col c
a1	b1	c1
a2	b2	c2

# That's all!
