Implementation of the Latin Language for the RGL

GF Summer School, Frauenchiemsee 2013

Herbert Lange
Centrum für Informations- und Sprachverarbeitung
München

22. August 2013

Current Status

- Translated nearly all strings in LexiconLat and StructuralLat
- Morphology for all common word types (with smart paradigms)
- Basic syntax rules to create simple Clauses
- Basic handling of pronoun drop (ExtraLat)
- On Github `https://www.github.com/daherb/GF`

Implementation of the Latin Language for the RGL
└─ The Latin RG
  └─ Project for the Summer School

Project for the Summer School

- Handling of modifiers for NPs (Adjectives, APs, ...)
- Rules to create S and Utt from Cl
- Evaluation of the Lexicon
- Further testing of the morphology

The more Distant Future

- Subordinate Clauses, relative clauses
- Different word orders
- Change handling incomplete paradigms
- Much more
